Задание 2 по модулю 5: Написать модуль ядра для своей версии ядра, который будет обмениваться информацией с userspace через proc. Адаптировать для своей версии ядра (Структура обработчиков). Избавиться от харкода (маг чисел) и изолировать переменные модуля (static).

```
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ ls -la /proc/proc_module
-rw-rw-rw- 1 root root 0 Sep  8 20:01 /proc/proc module
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$
```

```
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ cat /proc/proc_module
Hello from kernel module!
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ echo "This is a test message from userspace!" | sudo tee /proc/proc_module
This is a test message from userspace!
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ cat /proc/proc_module
This is a test message from userspace!
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ echo "This is a very long test message that exceeds the buffer size limit of 256 characters. Let's make it really long to test the truncation f
unctionality of our kernel module. This should be more than 256 characters." | sudo tee /proc/proc module
This is a very long test message that exceeds the buffer size limit of 256 characters. Let's make it really long to test the truncation functionality of our kernel module. This should be more
than 256 characters.
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ cat /proc/proc module
This is a very long test message that exceeds the buffer size limit of 256 characters. Let's make it really long to test the truncation functionality of our kernel module. This should be more
than 256 characters.
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$
```

```
than 256 characters.
user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ echo "" | sudo tee /proc/proc_module

user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$ cat /proc/proc_module

user@user-TUF-GAMING-FX504GD-FX80GD:~/M5/task2$
```
